- 1) Composition of content area subcommittees – need to make a recommendation to the Senate

 - b) One possible option:
 - i) Identifying core and adjacent disciplines for each content area (for example, core humanities disciplines could be PHIL, ENGL, HIST, etc. Humanities adjacent might be those disciplines (perhaps those that are more interdisciplinary in nature) that have some focus in the humanities (e.g. OLLAS, WGST, JMC, etc)
 - ii) Selecting some number (3 or 4??) with most coming from the core fields and the rest coming from adjacent.
 - iii) What about composition of cultural knowledge & civic knowledge?
 - iv) Here is a [draft list of core and adjacent fields](#) for each content area
- 2) Initial and *very draft* gen ed [course level approval rubric](#)?
 - a) Will be important during the approval process, but also important for the course redesign workshops currently being developed.
- 3) Rebranding ideas – Capstone student project [summary](#) & [presentation](#)
